

The safety of road maintenance personnel is a part of road safety. Our company has innovated and developed a safety warning complete set for road construction personnel by means of science and technology. This complete set is suitable for using in different road conditions and has the characteristics of flexible combination, easy to carry and obvious warning effect, which can effectively guarantee the personal safety of on-site construction personnel.

If assume the speed of vehicle is **100 km/h**, depending on the distance of the warning line, the system can generally provide an early warning time which is around **5.4s-7.2s**, and even **5.4s** is enough for us to span one or two lanes to escape, which could earn a precious time for on-site people to escape.

The Anti-intrusion warning system protects the personal safety of construction workers:

On the one hand, the traffic cone lights and traffic cones arranged around the operation area are equipped with bright LED lights and superior reflective performance to strongly warn drivers to pay attention to detour.

On the other hand, when a vehicle breaks into the operation area and knocks down the protective equipment, the Anti-intrusion warning system is started, and the hazard signal quickly reminds the operators of the site construction through the buzzer alarm: dangerous break in, pay attention to avoid!

Accessories Lists:

- Traffic Cone Light AB-185-2/AB-SU185-2 *20pcs
- Solar Warning Light AB-SU1230-2 * 3pcs
- Solar Strobe Light SWL-A001-2 * 3pcs
- Shoulder Light PSL-003-2 * 10pcs

ACTIVATE ACCESSORIES:

1. Traffic Cone Light (AB-185-2/AB-SU185-2)

The wireless synchronous traffic cone light sleeve automatically enters the standby state at the top of the traffic cone, and the LED flashes. Under the night environment, it strongly warns the driver to construct ahead, please slow down and detour. Once a vehicle breaks through the protective equipment and intrudes, the Anti-intrusion warning system is activated.

2. PVC Special Flexible Traffic Cone

PVC special flexible traffic cone is set around the construction area to form a road block, reminding the driver to construct ahead, slow down and detour.

ALARM ACCESSORIES:

After the Anti-intrusion warning system is started, the alarm accessories send out a beep alarm to warn the construction personnel: dangerous break in, pay attention to avoid!

1. Solar Warning Light (AB-SU1230-2)

2. Solar Strobe Light (SWL-A001-2)

3. Shoulder Light (PSL-003-2)
